

Alonso Sound Zebra2 Soundset [ReadMe]

Thanks for choosing the Alonso Sound Zebra2 Soundset.

This soundset covers a wide spectrum of genres. Instead of focusing on just electronic dance music sounds, I explored the synth a little further. This soundset comes with 128 sounds that each deliver a unique and different sound. I wanted to make this for all producers alike. Whether you make trance, lounge, soundtracks, electro, ethnic, experimental or anything in between, then you might just have a lot of fun with this.

Zebra2 can generate some very unique and unusual sounds like an accordion or the rare but beautiful whale drum. This is an exploration of Zebra2. A fierce, noble, delicate but powerful synth.

I wish you the best,

Adam Alonso

Installation:

Take the .zip file and extract in in the preset directory for Zebra2.

Here are the preset locations to extract to in whichever operating system you're using:

Preset folders PC

C:\program files\u-he\Presets\Zebra2\
(or ... \Vstplugins\u-he\Zebra2.data\Presets\Zebra2\ if “everything in Vstplugins” was chosen during installation)

Preset folders Mac

There are two different preset locations:

Global

MacintoshHD/Library/Audio/Presets/u-he/Zebra2/

User

~user/Library/Audio/Presets/u-he/Zebra2/

Start up your Zebra2 and the presets should be in the Preset Plane. Simply click on a patch name to select it.
